DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 34-47,52-65,68-73, drawn to method of polynucleotide detection, using a covalently bound tag classified in class 210, subclass 656.
 - II. Claims 48-51,66,67, drawn to polynucleotide detection using DNA binding tag, classified in class 435 , subclass 6.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions the mechanism of Group I involves the covalent binding of tag whereas Group II involves the reversible binding of intercalating dye.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Several telephone calls were attempted to Transgenomics Corp. on 5/22/01 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
